

CAMRON DEISS

Treasurer of the Board

Camron Deiss graduated from the University of Pittsburgh with a Bachelor of Science in Business Management. Camron is one of the four founding board members of DTCare, and his knowhow in accounting, all things business management, and HR are essential to all the functions of the organization.

Prior to his involvement in DTCare, Camron did a paid internship with a real estate property company handling their accounting via QuickBooks. He was responsible for creating all the company's journal entries, collecting monies from renters, paying the bills, and creating lease agreements. Then Camron began working for the D.T. Gruelle Company as an assistant controller, a job function that focused on all the AP responsibilities of the company. He took over as controller in 2020, which shifted his main function to accounts receivable. He manages collections and bank reconciliations, sets up rates for clientele, and assesses credit terms.

As treasurer for DTCare, Camron is primarily responsible for the banking function of the organization. He makes all needed payments, is responsible for employee payroll, transfers and wires money, liaises between the various international operation teams and DTCare headquarters in the USA, and solves monetary disputes. His accounting knowledge, business management savvy, and dedication ensure that he fills his role as treasurer expertly.
